

Product Catalog Application with Pagination, Header & Footer

Objective

Build a **React Product Catalog Application** that fetches product data from:

GET <https://dummyjson.com/products>

The application must implement:

- Header Component
- Product Listing
- Pagination
- Footer Component

Application Requirements

1. Header Component

Create a reusable **Header** component.

The header must contain:

- Application Title: "**Product Catalog**"
- Navigation Links:
 - Home
 - Products
 - About
- Simple styling (background color, padding, centered layout)

2. Product Listing Section

Fetch products using pagination:

<https://dummyjson.com/products?limit=10&skip=0>

Requirements:

- Display **10 products per page**
- Show product cards in grid format
- Each product card must display:
 - Product Image
 - Title
 - Price
 - Rating

3 Pagination Feature

Implement dynamic pagination.

Rules:

- Show:
 - Previous Button
 - Next Button
 - Current Page Number
- Each page must load 10 products.
- Update skip dynamically.

Example:

Page 1:

?limit=10&skip=0

Page 2:

?limit=10&skip=10

Page 3:

?limit=10&skip=20

Additional Requirements:

- Disable **Previous** button on Page 1
- Disable **Next** button on Last Page
- Do not reload the page (SPA behavior)

4. Footer Component

Create a reusable **Footer** component.

The footer must contain:

- Company Name
- Copyright
- Simple links (Privacy Policy, Contact)
- Centered layout

Example:

© 2026 Product Catalog App. All Rights Reserved.

Technical Requirements

- Use React Functional Components
- Use useState
- Use useEffect
- Use Axios for API calls
- Proper component structure:

src/

└─ components/

| └─ Header.jsx

| └─ Footer.jsx

| └─ ProductCard.jsx

| └─ Pagination.jsx

└─ pages/

| └─ Home.jsx

└─ App.jsx

Expected Output

- Clean responsive UI
- 10 products per page
- Working Previous / Next buttons
- Reusable Header & Footer
- Proper state management
